技术规格

Background:	This gene encodes a protein sharing high sequence similarity with ribosomal protein L39. Although the name of this gene has been referred to as 'ribosomal protein L39' in the public databases, its official name is 'ribosomal protein L39-like'. It is not currently known whether the encoded protein is a functional ribosomal protein or whether it has evolved a function that is independent of the ribosome.
Applications:	IHC
Name of antibody:	RPL39L
Immunogen:	Synthesized peptide derived from internal of human RL39L.
Full name:	ribosomal protein L39-like
Synonyms :	RPL39L1
SwissProt:	Q96EH5

IHC positive control:	Human brain tissue
IHC Recommend dilution:	50-100
